

GENERAL ACUPUNCTURE

Acupuncture Poll

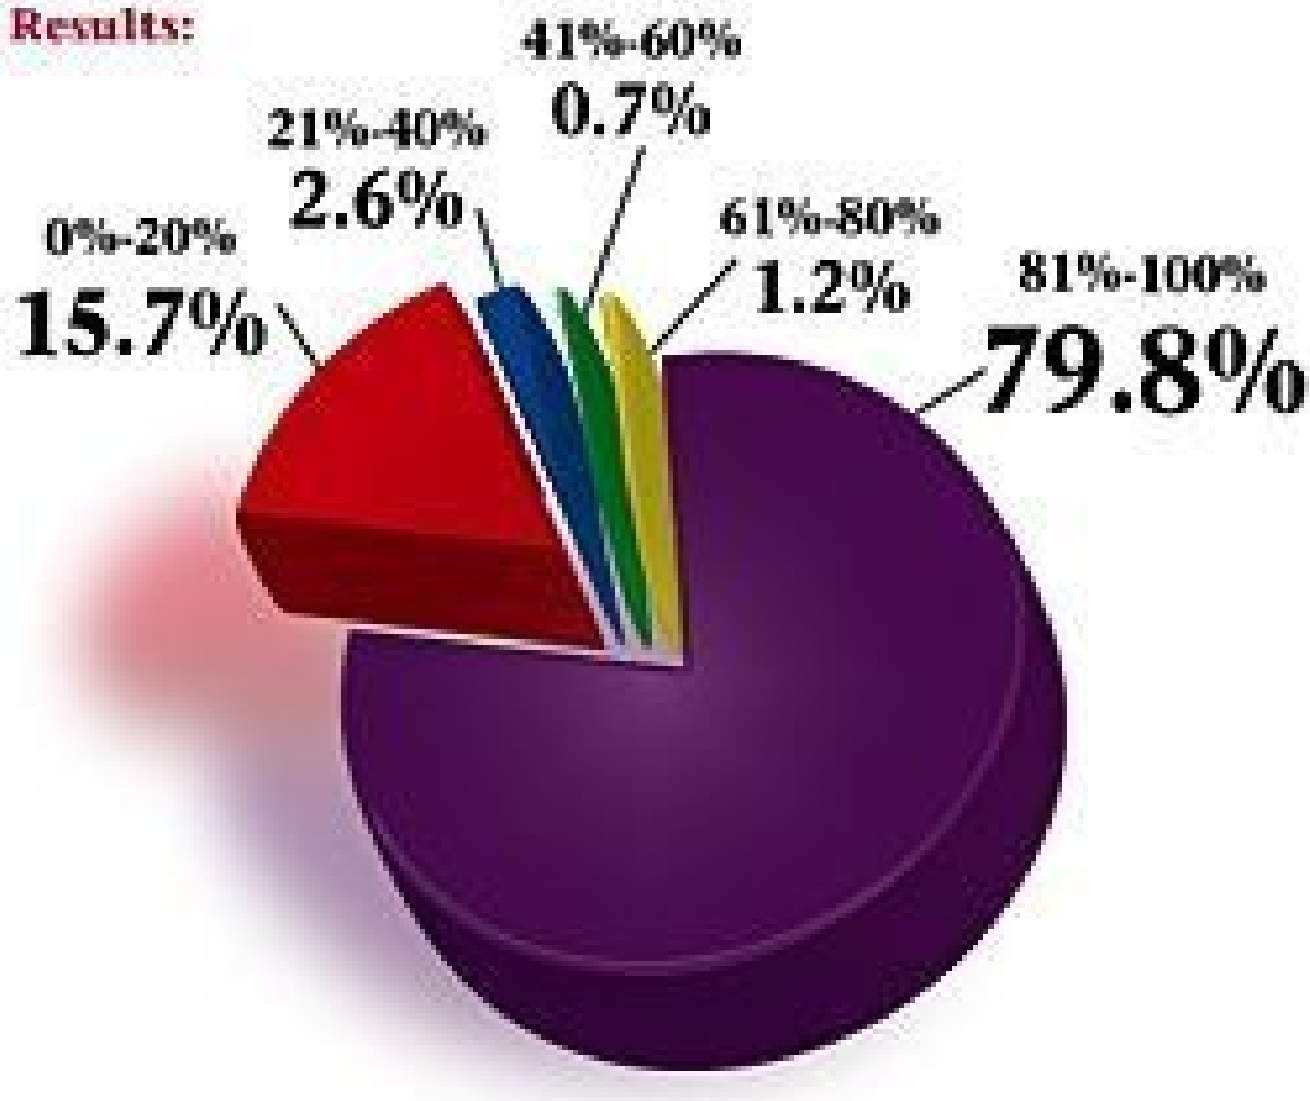

Editorial Staff

The Acupuncture Poll question for November 2004 was:

What percentage of your patients do you refer out to medical doctors or chiropractors each month?

Results:

Results:

These results are based upon 605 responses. As this is a voluntary, non-scientific survey, caution should be used in generalizing the results. Here is a sample of the comments made by those who took the survey and how they voted. Some comments have been edited for brevity.

0%-20%: I rarely refer out to chiropractors or medical doctors, as I am usually a last resort to most patients that come through my door.

21%-40%: Most of my clients are referred out at some point (beyond the obligatory initial referral). However, they do not necessarily need a referral each month.
